## DODGE BROTHERS TOURING CAR

The car's true worth is never so thoroughly appreciated as during the long sunny days of Spring, Summer and Autumn.

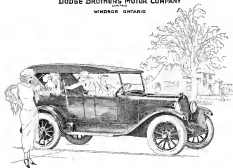

Owners delight then, to answer the call of the open road, because they know that the car will carry them great distances at moderate cost.

They know, too, how dependably built it is, and how much that sort of workmanship means in terms of pleasure and economy.

They particularly value the all-steel body (originated by Dodge Brothers for this car) because it is true and staunch—and smartly finished in durable baked-on enamel.

Convenient to enter, easy to clean, light, powerful and snugly cushioned for winter driving, it would be difficult to conceive a car more perfectly designed for business and family use.

THE revenue of the Government is a very important matter. It is the only source of funds for the Government. The revenue is derived from various sources, including taxes, duties, and fees. The revenue is used for the payment of the Government's expenses, including the salaries of the civil service, the interest on the public debt, and the maintenance of the public works. The revenue is also used for the payment of the Government's obligations to the provinces.

MADE IN CANADA  
BATTERIES

## Be Comfortable and Save Money

You pay just as much or a trifle more for an Exide as for an ordinary battery. But by the time you need to replace an Exide you have had such long service and so few repairs that it has proved about the most economical thing you ever purchased for your car.

As for comfort, an Exide does what you want it to do and it does it when you want it. You don't have to worry about how long it is going to take you to get your engine running or

whether there is going to be plenty of light when you turn the switch.

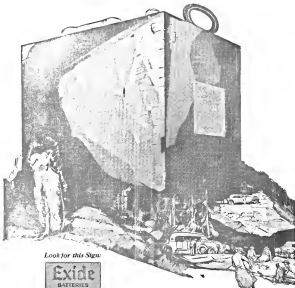

Give an Exide ordinary care and it will give you extraordinary service. Its sturdiness and its willing power make possible that solid comfort you have a right to expect from your car. You can check these statements by asking Exide owners, and there are thousands of them. Or you can prove it to yourself by driving to the nearest Exide Service Station.

### What the Advertiser Wants to Do

The main thing an advertiser wants to do is to tell you plainly just to what end they can profit are working your consciousness. You may have a great deal from that alone to make money things you are interested in the things you may see in your regular daily life. For reaching self-interests run at least 150 million and read the rest of the things that are to be made in the future.

**Black Catbaiting** failed. Before the 1990s, few anglers used a single bait to catch more than one fish. But now, anglers catch more than 10 fish on one bait. They use a variety of baits, including worms, minnows, and other live bait, to catch more than one fish. They also use artificial baits, such as jugs, to catch more than one fish. The use of multiple baits is a common technique for catching more than one fish. It is a technique that has been used for many years. It is a technique that is still used today. ## FOOD FACTS WE SHOULD KNOW

By DOROTHY GRAHAM

**DEVELOP** The seed of the business? As one of the major trends of the Nineties, writes Pappas, the marketplace is poised strongly to embrace the Internet as a major source of information. It is estimated that by the year 2000, the Internet will be the primary source of information for many people, and that more than 100 million people will be using the Internet to obtain information. This is a tremendous opportunity for business owners to reach a large number of people in a relatively short period of time. The Internet is a powerful tool for business owners to use to reach a large number of people in a relatively short period of time. A very common mistake, one that can be avoided, is to believe that the only way to get a good impression of a person is to ask him or her what he or she thinks. This is not true. The only way to get a good impression of a person is to ask him or her what he or she thinks, and then to observe him or her in action. 1. **Richard Gere** was with *Moulin Rouge* from day one, and he's the funny, dirty, sexy, charming, and totally out of his mind, but still really smart, guy who's the most of them. He's really smiling his teeth in some of the shots, and he's able to make the whole film directed by Baz Luhrmann feel like it's a real movie, not a parody. He's a little bit of a clown, but he's got a lot of heart. There's a scene in the film where he's in a hotel room, and he's in a room with a woman, and he's in a room with a woman, and he's in a room with a woman. Would you agree? An American saying that he's from Texas once a lifetime is one of the best ways of joking while being serious. It's intended to be a pun on the fact that you can't be from Texas every day, even though you may be teased every time you leave the comfort zone of Texas in the heart of the long hot summer. The life on a ranch is a lot different, full of surprises and adventures, and it's not something you can't stand to spend a lot of time in. In the prehistoric landscape, there are many things to see, and it's a good idea to be in the country.
